Where Old World Meets Contemporary

Entry Doors by Italdoor

Charm, Character & Curb Appeal

Italdoor manufactures high quality wood entry doors, in a wide variety of designs, sizes and shapes. We have decorative glass, iron and hardware that add a beautiful finishing touch. At Italdoor, you will find a door that welcomes you home.

Since a front door is a key factor in achieving curb appeal, it is recommended to budget 1- 5% of the home's value on the front door alone.

Mahogany is the best wood choice, as it is beautiful, durable and will suit every budget.

If you are building or renovating a home, save time and money by selecting from our vast array of designs. We can provide a shop drawing and a full sized template for your drywaller and stone mason to build the openings.

We stock various doors and framed units for orders requiring immediate shipment.

If you are changing an existing door, we will build to suit your opening.

Contemporary, Old World & Transitional

Whatever your design theme, Italdoor has the door for you. Various designs are shown throughout this brochure, but if you have something else in mind, send in your own drawing or photo.

All doors can be made in any size or type of wood. In custom homes, tall doors are spectacular. If you have 9' ceilings, 7'6" door height is ideal, leaving room for casing trim and crown moulding above.

Apart from size, design and various wood types, doors can be installed in various ways. Any door can be used as sliding or bifolding. We can help you select the right door, hardware and method of installation.

Esquire

Minimalist to Modernist

Flush Doors are used for residential, office, hotel and fire rated suite entries. A solid core flush door has a heavy quality feel and tends to weigh approximately 5 lbs/sq.ft. If you need a lighter weight, please order hollow core.

Fire ratings are available in 20, 45, 60 and 90 minutes. A fire rating of 20 minutes is common for condo suite entries and libraries, while higher ratings are required for stairwells and basements. To be sure what rating you need, check with the local fire marshal.

For areas requiring sound proofing, inquire about a sound seal kit.

Flush doors are beautiful in any application looking for a simple minimalist look.

Add character by selecting interesting wood grains, plastic laminate, stainless steel faces or inlays. You can also add wood trim for a paneled look. Add function and design with window lites. See pages 8 and 9 for ideas.

The Final Touch

Italdoor has an extensive selection of all kinds of hardware and door accessories. The key to choosing the right hardware is to compliment your door in size, shape and colour. We carry knobs, levers, entry sets and custom door pulls from most brands including Aurum, Baldwin, Emtek, Rocky Mountain, Weslock, Dorex and Medeco.

Colours include satin nickel, pewter, bronze, polished brass, satin or antique brass, black, polished chrome and satin chrome. Our salespeople can help you with the complete list of hardware you will need. We also carry UL or WH listed hardware for fire rated doors.

Wood Types

Cherry

Oak

Walnut

Quarter Cut Fir

Rotary Birch

Our wood doors can be made in various wood species, such as poplar, oak, mahogany, cherry, pine, walnut, maple, birch and fir. Most woods come automatically in flat cut. For a straight sleek grain, ask for quarter cut or rift cut. For a more interesting grain, ask for birch, which is typically rotary cut.

Italdoor Profiles

Standard Italdoor Moulding Profiles

Custom Profiles

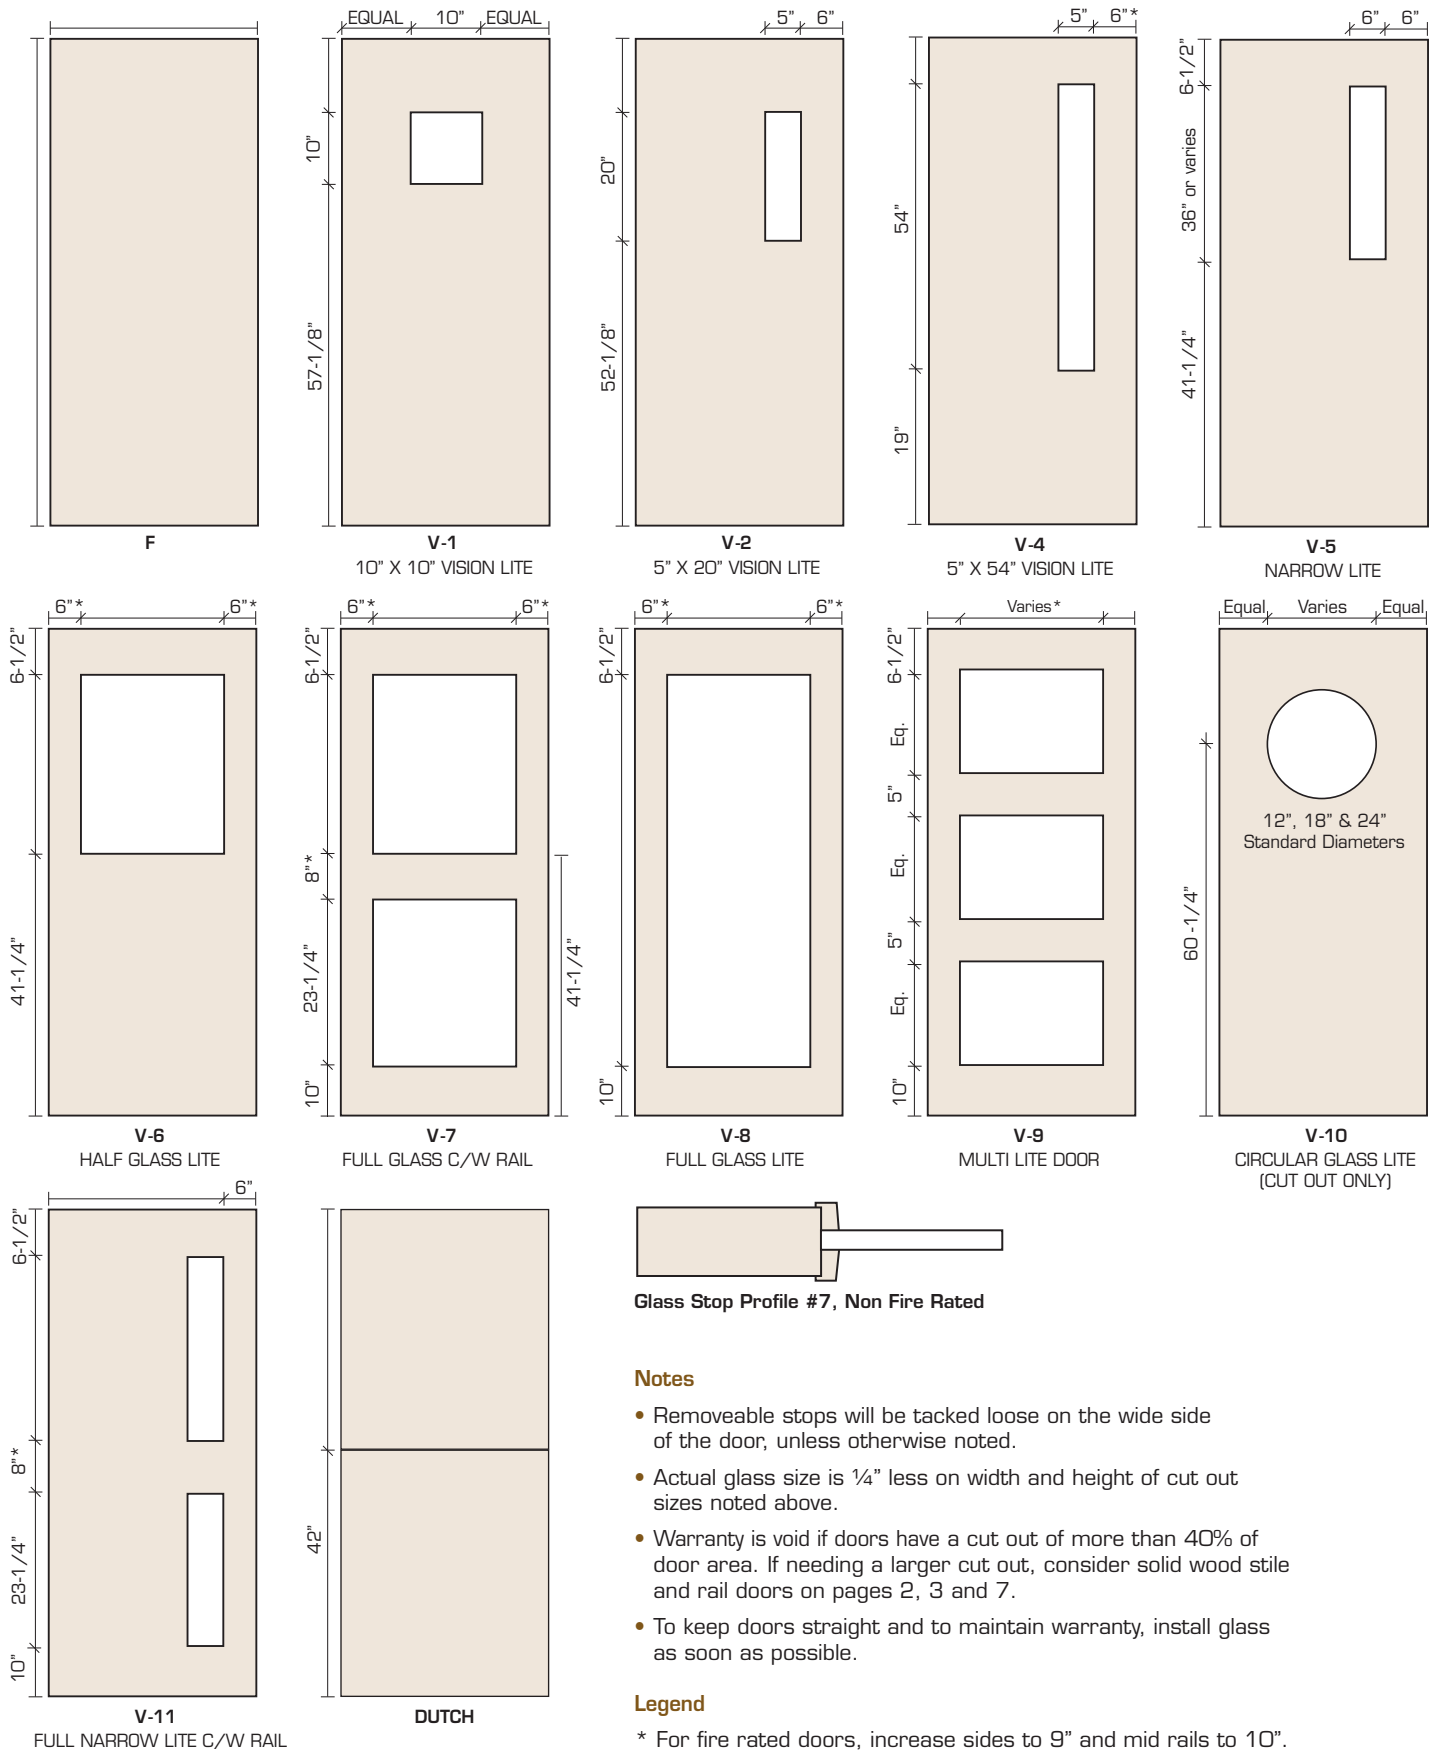

Notes on Profiles and Panels

- Moulding profiles and panel types can be mixed and matched (i.e.: To order Profile 1 with panel F, specify Profile 1F).
- Italdoor has many more profiles than shown. If you need a profile not shown, please send in your request (set up costs may apply).
- Solid wood raised panels wider than 9" have a potential to develop cracks. It is the nature of wood, not the workmanship that causes this. While repair is possible, it is not covered under warranty. Flat panels are engineered not to crack.

Notes All Flush Doors are made with Type I and Type II adhesive. Our adhesive is both waterproof and water resistant. Doors can be larger than maximum size noted, but warranty may be void depending on sizes. Inquire for transoms, dutch doors, or modifications not noted. Field trim on doors is limited to half inch (1/2") from bottom, and one-eighth inch (1/8") from lock stile. Ask for 3" bottom rail if cutting will be required. *All lites in fire rated doors must be 5-1/2" away from door edges or hardware cut outs for Fire label regulations; See above for maximum square inches allowed for multiple lites.

Hardware Types A. On non rated doors, all hardware types can be used
B. On fire rated doors, the following is allowed (all hardware must be UL or WH listed for wood or mineral core door construction)
Ball bearing hinges, 4x4" for 3x7 or less, 4-1/2 x 4" for larger doors, or listed continuous hinges
Closer: Listed Closers or listed Spring Hinges, 2 per door leaf
Latches: listed latchsets
Deadlock: listed deadbolts; must be drilled with 5-1/2" clearance to other hardware or lite cut outs
Transom Panels: listed spring bolts
Louvers: Max 24" x 24" in 45, 60 and 90 min doors; must have 10" bottom rail and 6" sides; Louvers are not available in doors with lites
Door Bottoms, Door Viewers
Kickplates up to 16" high
Astragals are required on double doors

Faces All Flush doors are available with many different face options.
Quick Ship Options:
● Masonite for paint
● Rotary Cut Birch in 3 grades (paint grade, stain grade or clear varnish grade)
● Flat Cut Woods including Red Oak, African Mahogany, Cherry, Walnut, Maple, Luaun
Other Options
● Flat, Rift or Quarter, Rotary Cut Woods of almost any Species
● Plastic Laminate General Purpose (GP) grade by Wilsonart, Formica, Pionite, Octolam, Arborite, Plastic Backer for Paint
● Split faces is available, consult order desk to order; Split faces voids door warranty (Except when one face is Plastic laminated and other side is Plastic Backer for Paint).

Options ● Bi-fold Units; Sliding doors ● Dutch Door, optional shelf (n/a on fire doors) ● Matching Transom ● Machining for hardware ● 3 - 9" bottom rail for field trimming
● Arch tops (n/a on fire doors) ● For a decorative look, add on panels or applied mouldings, or use Custom Veneers or Plastic Laminated Faces

Conforming Standards Doors meet governing standards. ASTM D 5456 WDMA I.S. 1A-04 CSA 0132.2 SERIES 90 CAN4-S104 NFPA 80
LEEDS forms and letters are available for projects applying for Leeds Credits

Warranty One year limited warranty. Extended Warranties are available.

All Information is for guideline purposes only and subject to change; please consult with Italdoor for specific requirements and updates. See page four (4) for Photo Gallery of Flush Doors.

Handings by Italdoor

The simplest way to identify your door handing is to stand with your back against the hinges, then, if the door swings to your right, it is Right Hand, (RH), and if it swings to your left, it is Left Hand (LH). Consult with us if ordering outswing exterior doors and when hardware is ordered.

Manufacturing Fine Doors Since 1972

Experience

Canadian owned & operated, Italdoor has been manufacturing doors since 1972. With decades of experience, we have fine tuned a manufacturing process to give you the best quality doors.

Any Quantity

Our facility is able to produce over 200 doors per day. Small, medium or large, we can handle any size order.

Any Wood Type

Our wood doors can be made in almost any wood species. Poplar, oak, mahogany, cherry, pine, walnut, maple, birch, and fir are just a few of our stock woods. Most woods come automatically in flat cut grain. For a straight sleek grain, ask for quarter cut or rift cut. For a more interesting grain, ask for birch, which is typically rotary cut. For "Old World" character, consider quarter cut white oak, which has a historical look.

Any Size

Standard sizes, as well as custom or odd sizes, are available. Oversized doors can range from 4' to 6' wide, and 10' to 12' high. Inquire for custom sizes.

Any Design

Doors can really enhance the look of your home. Whatever your taste or budget, we can provide the right doors for you. Choose from our selection, or send us your sketch or photo. We can replicate almost any design.

Glass Designs and Safety Glass

To add light to a space, incorporate glass and or mirror right in your door. We offer a wide range of glass types, including plain, textured, leaded, thermo paned or decorative glass. Visit our showroom or our website for more options.

Any Method of Install

You can install your doors in the following ways:

- Regular Swinging
- Pocket Slider
- Wall Mount Slider
- Bifold

Any Budget

We have doors available in all price ranges. Our sales staff will assist you in finding the right doors to fit your both your needs and budget.

One-Stop Service

Whether you only need doors or the full service, we can offer any of the following:

- Doors
- Frames
- Hardware and other accessories
- Machining for hardware
- Staining or painting
- Delivery
- Installation

Lead Times

The lead time can vary depending on the door you choose. Due to the custom nature of orders, delivery dates may vary. Please discuss timing with your salesperson.

Showroom

We have a large showroom which displays our wide range of options. We stock hundreds of doors for immediate shipping.

Warranty

Should a defect occur that is covered under our standard warranty, Italdoor will replace or repair our product if reported to us in writing within one year of purchase. When sending in a report, please include photos, contact information, project location, and invoice copy. Please ask for a copy of our warranty or visit our website.
